

Rinnai

Get the most out of your Rinnai INFINITY with water controllers

Temperature Fluctuations

Continuous Flow water heaters like all types of water heaters can experience temperature fluctuations when other taps are turned on. Water controllers avoid this by maintaining an exact temperature even when other taps are used or a toilet is flushed.

Safety

The installation of Water Controllers allow you to select the exact temperature you need, reducing the chance of scalds. Our Deluxe Controllers have the added feature of an automatic bath fill which stops the water flow at your desired level. This also means that young children can no longer play with the hot tap because no water will come from it!

Ease of Use

Simply select the temperature you want and turn on the hot tap. Not only can you experience total control in the bathroom, but unlike other Continuous Flow hot water systems, you can have up to four controllers... a controller for the Bathroom, Kitchen, Ensuite and even the Laundry.

Extended Warranty

Rinnai INFINITY installations with 2 or more Water Controllers receive an extended parts & labour warranty.

Top Tip:

Wireless Universal controllers are the easiest and quickest to install and are particularly suitable for retrofitting into existing homes.

Hard wired Universal Controllers are usually cheaper to purchase and wiring can often be run through the roof and walls

Types of Rinnai Water Controllers

Wireless vs Hard-wired Controllers

Up to 4 Water Controllers can be installed throughout a home for all Rinnai INFINITY models in almost combination - Wired, Wireless & Deluxe. It is not always possible to run wires in all installations so we have introduced both options for the Universal model catering for different situations.

Universal Controllers

(Both Wireless & Hard-wired versions) with the following functions:

- Precise temperature control
- Room (priority) transfer
- Smartstart® preheat system functions
- Child Lock (Wireless only).

Deluxe Controllers

(Hard-wired only) with all of the functions of the Universal model with addition of:

- Master Controller usually installed in the Kitchen
- Separate Bathroom Controllers
- Automatic Bath fill function
- Shower saver feature – preset your desired litres
- Digital Clock, Speaker & Volume Controls
